Topic: Linux File and Directory Management Using Basic Terminal Commands

1. Open your Linux terminal and use the `pwd`, `ls`, and `cd` commands to navigate to your Downloads folder and list all files inside it.

⇒ Step 1: Display the Current Working Directory

`pwd`

Sample Output:

`/home/student`

Step 2: List the Files and Directories

`Ls`

Step 3: Navigate to the Downloads Folder

`cd Downloads`

Step 4: Verify the Current Directory

`Pwd`

List All Files Inside the Downloads Folder

`Ls`

2. Create a new directory called 'music_playlist' inside your home directory using the `mkdir` command, then use the `touch` command to create three empty files named `song1.mp3`, `song2.mp3`, and `song3.mp3` inside it.

⇒ Step 1: Go to the Home Directory

`cd ~`

Step 2: Create a New Directory

`mkdir music_playlist`

Step 3: Move into the New Directory

`cd music_playlist`

Step 4: Create Three Empty Files

`touch song1.mp3 song2.mp3 song3.mp3`

Step 5: Verify the Files

Ls

3. Use the cp command to copy all files from your 'music_playlist' directory to a new directory called 'backup_playlist', then use the ls command to verify the files were copied.

⇒ Step 1: Return to the Home Directory

cd ~

Step 2: Create the Backup Directory

mkdir backup_playlist

Step 3: Copy All Files

cp music_playlist/* backup_playlist/

Step 4: Verify the Copied Files

ls backup_playlist

4. Use the mv command to rename 'song1.mp3' to 'favorite_song.mp3' inside the 'music_playlist' directory, and then use the rm command to delete 'song3.mp3' from the same directory.

Hint: Make sure you are inside the correct directory before running mv or rm.

⇒ Step 1: Go to the music_playlist Directory

cd ~/music_playlist

Step 2: Rename song1.mp3 to favorite_song.mp3

mv song1.mp3 favorite_song.mp3

Step 3: Delete song3.mp3

rm song3.mp3

Step 4: Verify the Changes

ls
